**Published / Filed:** Oct. 6, 2000 / March 29, 1999

**Application Number:** JP1999000085029

**IPC Code:** H04Q 9/00; G08B 25/01;

**Priority Number:** March 29, 1999 JP1999000085029

**Abstract:**

**PROBLEM TO BE SOLVED:** To obtain a remote monitoring system by which a device to be monitored can economically be monitored and that can quickly cope with contents of operational information received by a monitoring device, especially with emergency information quickly.

**SOLUTION:** A client section 12 to be monitored transmits operation information of a multi-story parking installation 1 to a monitoring center 2 through the Internet 4 by means of an electronic mail, an information analysis section 32 analyzes contents of the electronic mail and a database server 33 stores the result, Then a browsing server 34 serves the contents of them to a monitor client section 23 and a maintenance client section 51, transmits it to each of the client sections 23, 51 when the operation information indicates emergency data such as occurrence of a fault by means of the electronic mail, each of the client sections 23, 51 reads the electronic mail again and displays the newest emergency data and activates alarm units 44, 55.
